AXA BIKE SECURITY

AXA Dwn SERIES

Powerful USB lights

Visibility and good vision in traffic are of essential importance to the safety of a cyclist. We are proud to present our new USB rechargeable lighting line: the Dwn. The Dwn lights are extremely strong and have a matt design. The series consists of 4 different headlights and 2 rear lights, all of them are StVZO approved.

Headlight

There are 4 versions of the headlight: 30, 50, 70 and 100 lux. The 30 lux version has 2 different light modes, the 50 and 70 lux have 3 settings and the 100 lux has no less than 4 different light settings. From full power to a battery-saving mode so that the light lasts a long time.

Aluminium casing

The 70 and 100 lux version have an aluminium heat shield that give the light a high end look and feel.

Bracket

For the Dwn we have designed a new bracket that is fixed in the light. As a result, the headlight is closer to the handlebars and the headlight becomes more compact.

Ergonomic on/off button with battery low indicator

Mounting on the seat post

Mounting on the seat stay

Mounting rear light

The rear light can be mounted in 2 ways. You can mount it on the seat post or on the seat stay.

Integrated brake light function

Integrated brake light function

There are 2 different rear lights. The Dwn rear is the basic rear light. In addition, there is the Dwn rear signal. This version has an integrated brake light function. This function makes cycling in traffic safer. This way you can see the bike braking in front of you, and the person behind you can see that you are slowing down.

Battery indicator

We have a new battery low indicator that has 3 levels. When the battery is charged, no light is on. Once the battery is between 21-50%, the battery indicator will turn green. And when it falls below 20%, it turns red.

Sustainably rechargeable

The AXA Dwn is sustainably rechargeable via an USB-C connection or a main adaptor. The lights are fully charged within 1.5 to 3,5 hours and you are ready to safely hit the road again. With a life span of more than 1000 recharges it guarantees years of cycling pleasure.
