

ALLEGION

AXA Nxt SERIES

A new step in
light evolution

AXA BIKE SECURITY

Wide beam and integrated reflector

The Nxt offers optimal light distribution

We hereby introduce our new line with dynamo and E-bike lighting. The headlights have a new landscape design that perfectly matches the bike's geometry. All versions are StVZO approved.

Light distribution

The Nxt offers a great light distribution. The near-field illumination and wide beam ensure that you have a good view in front of you, but also 10 meters ahead. The integrated reflector offers extra safety because you are more visible to oncoming traffic.

Versions

You can choose from 4 different lux types: 30, 45, 60 and 80 lux. All dynamo versions have an on/off switch and are equipped with steady light. This means that the lamp burns for another 4 minutes when you are standing still. The 30 lux E-bike version can be connected to a 6-48V battery, the other E-bike versions to a 6-12V battery.

Bracket

The Nxt can be mounted in 2 ways. It comes with a newly designed bracket that fits all standard front forks. This bracket can be replaced by a one-arm aluminum handlebar bracket. This allows the headlight to be attached to the handlebar.

Front fork bracket

One-arm handlebar bracket
